

**Before we begin, are there any questions from last day's work?**

**READ** Ex.1 pp. 378-379

pp. 381-384 #5, 7, 9, 10, 14, 20, 22

**Enrichment:** p. 384 #23

## Today's Learning Goal(s):

By the end of the class, I will be able to:

- a) Solve problems involving right triangles.

**SWYK next class on:**

**Similar Triangles and  
SOH CAH TOA**

p.382

#10

$$\begin{aligned} \text{c) BA: } \tan \theta &= \frac{70}{35} \\ \theta &= \tan^{-1}\left(\frac{70}{35}\right) \\ &\approx 63.43 \\ &\approx 63.4^\circ \end{aligned}$$

$$\begin{aligned} \text{a) TWA} \\ \tan C &= \frac{35}{30} \\ C &= \tan^{-1}\left(\frac{35}{30}\right) \\ &\approx 49.39 \\ &\approx 49.4^\circ \end{aligned}$$

b) find CA : SOH

$$\sin 49.4^\circ = \frac{35}{CA}$$

$$\begin{aligned} CA &= \frac{35}{\sin 49.4^\circ} \\ &\approx 46.09 \\ &\approx 46.1 \text{ m} \end{aligned}$$

50m = sand wedge

SOH

$$\sin 63.4^\circ = \frac{70}{AH}$$

$$\begin{aligned} AH &= \frac{70}{\sin 63.4^\circ} \\ &\approx 78.2 \end{aligned}$$

$\therefore$  pitching wedge (pitching = 9m wedge)

MPM 2DI

## 7.5 Solve Problems Involving Right Triangles (Day2)

Date: Dec. 19/16Warm-up: Solve for  $k$ , to one decimal place.

CAH

$$\cos = \frac{\text{adj}}{\text{hyp}}$$

$$\cos 38.2^\circ = \frac{k}{18.7}$$

$$k = 18.7 \cos 38.2^\circ$$

$$\approx 14.69$$

$$\approx 14.7 \text{ cm}$$

$$k = 14.7 \text{ cm}$$

Today's practice pp. 382-385 #13, 17, 21, 27

SWYK next class on:

Similar Triangles and  
SOH CAH TOA

Today's practice: pp. 382-385 #13, 17, 21, 27

SWYK next class

$$\angle \text{---} = \angle \text{---} \quad ( \text{---} )$$

$$\angle \text{---} = \angle \text{---} \quad ( \text{---} )$$

$$\therefore \triangle ABC \sim \triangle DEF$$
