

Before we begin, are there any questions from last day's work? 4.2.4

## Today's Learning Goal(s):

By the end of the class, I will be able to:

- a) sketch the sine and cosine functions.
- b) determine "any" angle  
using the "CAST Rule" with the "raa" (related acute angle).

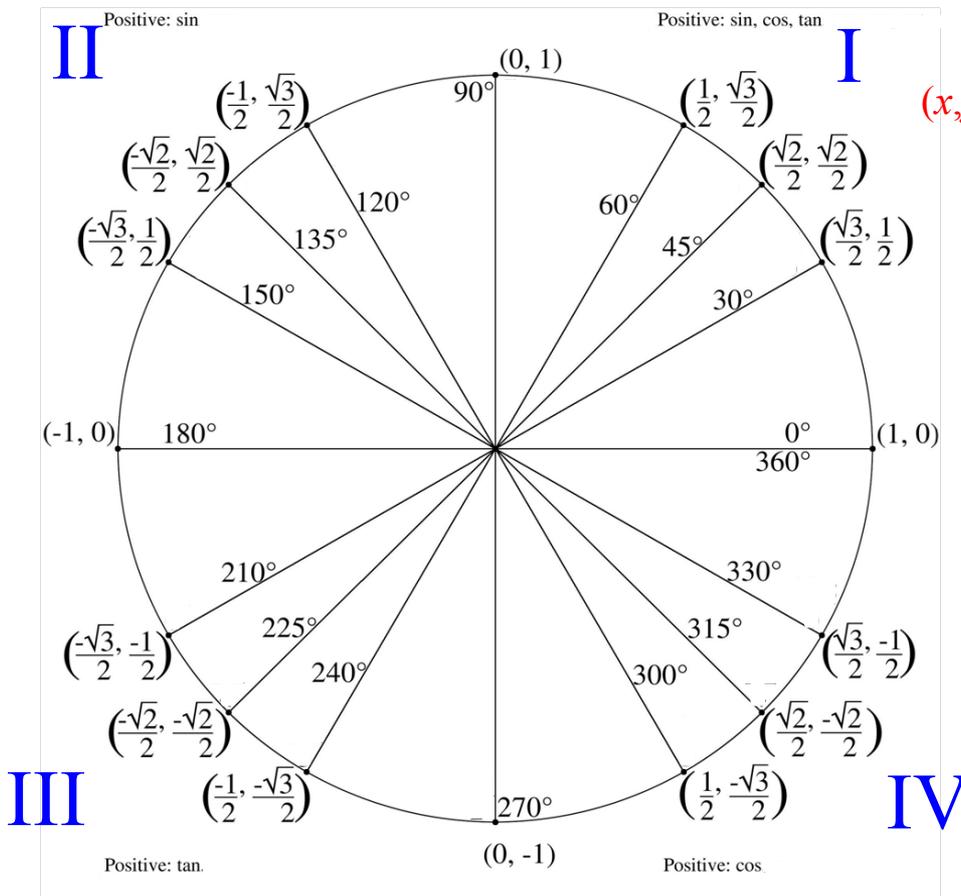

Warm-up

Complete the chart below:  
(Did you Memorize it as instructed?)

| $\theta$      | $30^\circ$           | $45^\circ$           | $60^\circ$           |
|---------------|----------------------|----------------------|----------------------|
| $\sin \theta$ | $\frac{1}{2}$        | $\frac{1}{\sqrt{2}}$ | $\frac{\sqrt{3}}{2}$ |
| $\cos \theta$ | $\frac{\sqrt{3}}{2}$ | $\frac{1}{\sqrt{2}}$ | $\frac{1}{2}$        |
| $\tan \theta$ | $\frac{1}{\sqrt{3}}$ | 1                    | $\sqrt{3}$           |

### 4.3.1 The Unit Circle

Date: \_\_\_\_\_

$(x,y) = (\cos\theta, \sin\theta)$

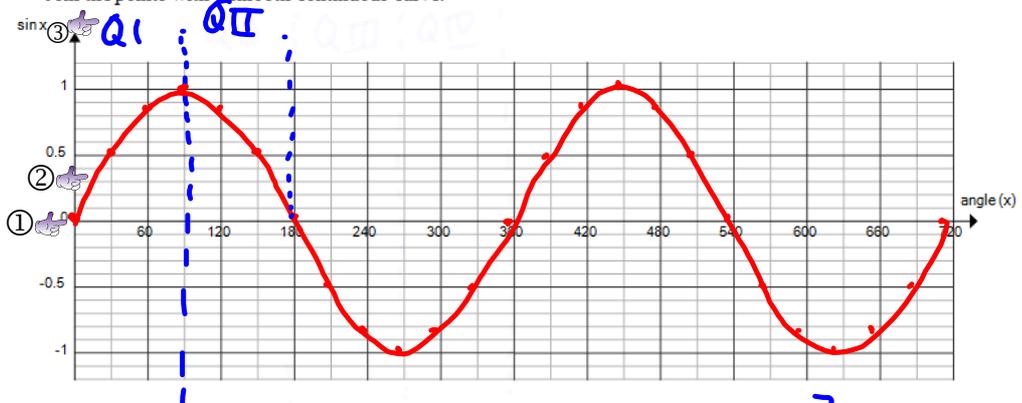

4.3.2 Investigating the Properties of Sinusoidal Functions Date: Apr. 6/18

A. Graphing  $y = \sin \theta$  ( $y = \sin x$ )

1. Complete the table.

|   |     |               |                      |     |                      |               |     |                |                       |     |                       |                |     |
|---|-----|---------------|----------------------|-----|----------------------|---------------|-----|----------------|-----------------------|-----|-----------------------|----------------|-----|
| Angle $\theta$ ( $^\circ$ )             | 0   | 30            | 60                   | 90  | 120                  | 150           | 180 | 210            | 240                   | 270 | 300                   | 330            |     |
| Exact value of $y$ ( $\sin \theta$ )    | 0   | $\frac{1}{2}$ | $\frac{\sqrt{3}}{2}$ | 1   | $\frac{\sqrt{3}}{2}$ | $\frac{1}{2}$ | 0   | $-\frac{1}{2}$ | $-\frac{\sqrt{3}}{2}$ | -1  | $-\frac{\sqrt{3}}{2}$ | $-\frac{1}{2}$ |     |
| Decimal value of $y$ (2 decimal places) | 0   | 0.5           | 0.86                 | 1   | 0.86                 | 0.5           | 0   | -0.5           | -0.86                 | -1  | -0.86                 | -0.5           |     |
|   | 360 | 390           | 420                  | 450 | 480                  | 510           | 540 | 570            | 600                   | 630 | 660                   | 690            | 720 |
| Exact value of $y$ ( $\sin \theta$ )    | 0   | $\frac{1}{2}$ | $\frac{\sqrt{3}}{2}$ | 1   | $\frac{\sqrt{3}}{2}$ | $\frac{1}{2}$ | 0   | $-\frac{1}{2}$ | $-\frac{\sqrt{3}}{2}$ | -1  | $-\frac{\sqrt{3}}{2}$ | $-\frac{1}{2}$ | 0   |
| Decimal value of $y$ (2 decimal places) | 0   | 0.5           | 0.86                 | 1   | 0.86                 | 0.5           | 0   | -0.5           | -0.86                 | -1  | -0.86                 | -0.5           | 0   |

2. Use the decimal values of  $\sin \theta$ , and plot the ordered pairs  $(\theta, \sin \theta)$  on the grid below. Join the points with a smooth continuous curve.

3. Properties of the function  $y = \sin x$

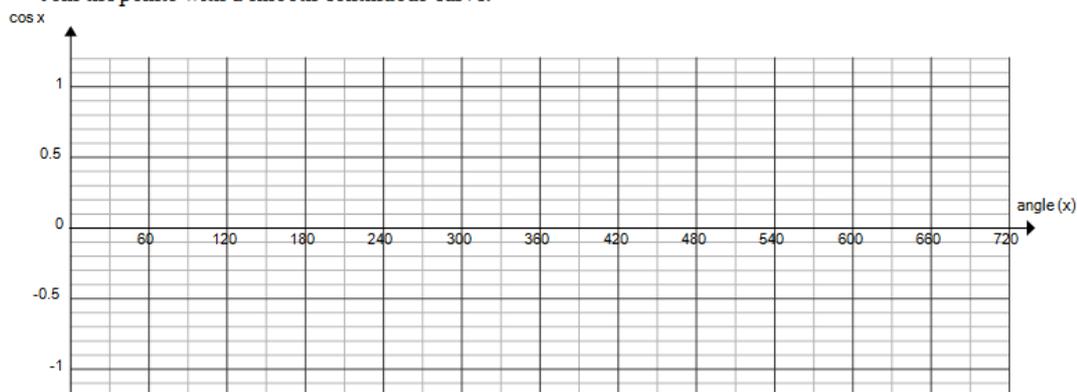

- ④ a) Length of the period:  $360^\circ$       b) Domain:  $\{x \in \mathbb{R}\}$   
 c) Maximum value of  $\sin x$ :  $1$   
 d) Minimum value of  $\sin x$ :  $-1$       e) Range:  $\{y \in \mathbb{R} \mid -1 \leq y \leq 1\}$

B. Graphing  $y = \cos \theta$  ( $y = \cos x$ )

1. Complete the table.

|  |     |     |     |     |     |     |     |     |     |     |     |     |     |
|--|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|
| <b>Angle <math>\theta</math> (<math>^\circ</math>)</b>         | 0   | 30  | 60  | 90  | 120 | 150 | 180 | 210 | 240 | 270 | 300 | 330 |     |
| <b>Exact value of <math>y</math> (<math>\cos\theta</math>)</b> |     |     |     |     |     |     |     |     |     |     |     |     |     |
| <b>Decimal value of <math>y</math> (2 decimal places)</b>      |     |     |     |     |     |     |     |     |     |     |     |     |     |
|  | 360 | 390 | 420 | 450 | 480 | 510 | 540 | 570 | 600 | 630 | 660 | 690 | 720 |
| <b>Exact value of <math>y</math> (<math>\cos\theta</math>)</b> |     |     |     |     |     |     |     |     |     |     |     |     |     |
| <b>Decimal value of <math>y</math> (2 decimal places)</b>      |     |     |     |     |     |     |     |     |     |     |     |     |     |

2. Use the decimal values of  $\cos\theta$ , and plot the ordered pairs  $(\theta, \cos\theta)$  on the grid below. Join the points with a smooth continuous curve.

3. Properties of the function  $y = \cos x$

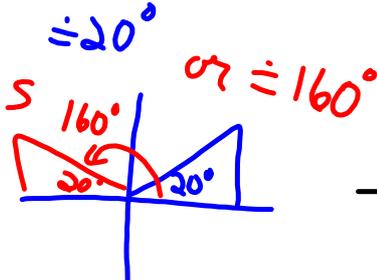

- a) Length of the period: \_\_\_\_\_
- b) Domain: \_\_\_\_\_
- c) Maximum value of  $\cos x$ : \_\_\_\_\_
- d) Minimum value of  $\cos x$ : \_\_\_\_\_
- e) Range: \_\_\_\_\_

4.3.3 Determining the Measure of an Angle from ANY Given Trigonometric Ratio

1. Use each trigonometric ratio to determine all of the values of  $\theta$ , to the nearest degree, if  $0^\circ \leq \theta < 360^\circ$ .

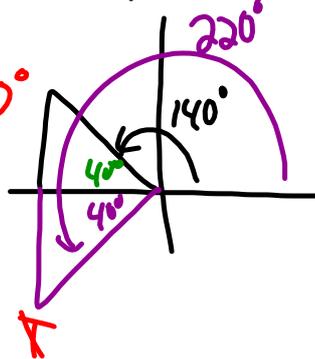

a)  $\sin\theta = 0.3423$

$\theta = \sin^{-1}(0.3423)$   
 $\approx 20.01$   
 $\approx 20^\circ$

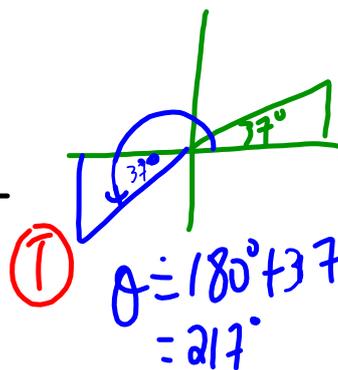

b)  $\cos\theta = -0.766$

$\theta = \cos^{-1}(-0.766)$   
 $\approx 139.9$   
 $\approx 140^\circ$  or  $\approx 220^\circ$

c)  $\tan\theta = 0.753$

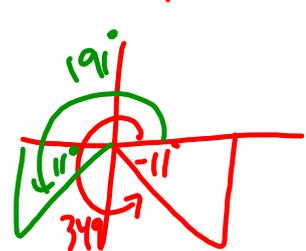

$\theta = \tan^{-1}(0.753)$   
 $\approx 36.9$   
 $\approx 37^\circ$

$\theta = 180^\circ + 37$   
 $= 217^\circ$

d)  $\sin\theta = -0.1908$

$\theta = \sin^{-1}(-0.1908)$   
 $\approx -10.9^\circ$   
 $\approx -11^\circ$

$\therefore \theta = 349^\circ$   
 or  $\theta = 191^\circ$

Today's Homework: 4.3.3 #1, 8, 9, 12, 13

(already complete on next slide)

sin θ

- ☞ over 2
- ☞ square root sign
- ☞ fingers away from 0

|    |                      |               |
|----|----------------------|---------------|
| 0  | $\frac{\sqrt{0}}{2}$ | 0             |
| 30 | $\frac{\sqrt{1}}{2}$ | $\frac{1}{2}$ |
| 45 | $\frac{\sqrt{2}}{2}$ |               |
| 60 | $\frac{\sqrt{3}}{2}$ |               |
| 90 | $\frac{\sqrt{4}}{2}$ | 1             |
