

Before we begin, are there any questions from last day's work? **5.2.1**

pp.61-62 1,3c,4,6,8

pp.69-70 1c,3,5,7,9

(Tuesday's quiz will be based on the first three lessons; this includes today's)

Today's Learning Goal(s):

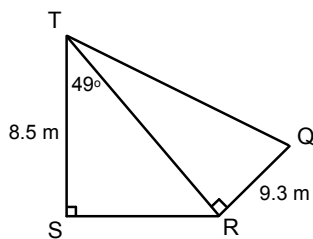

By the end of the class, I will be able to:

- solve trigonometry questions involving more than one triangle.

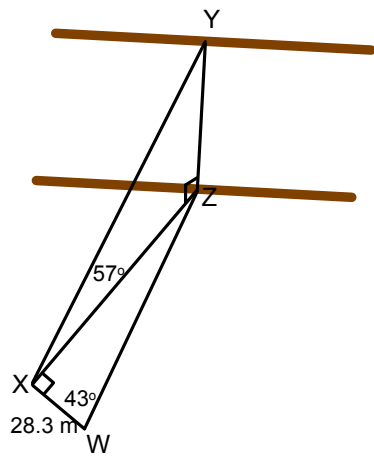

5.3.1: Solving Problems Involving More Than One Triangle

Ex. 1 Determine the measure of $\angle Q$.

Date: _____

Ex. 2 Determine the height of the cliff, in metres.

Ex. 3 Determine the value of x .
